EDUCATION

Indian Institute of Information Technology, Jabalpur
B.Tech in Electronics & Communication Engineering — CPI: 9.3

Jabalpur, Madhya Pradesh
Aug. 2023 – May 2027

Mar Dionysius Senior Secondary School, Mallappally
12th Grade — 96%

Mallappally, Kerala
April 2021 – March 2022

EXPERIENCE

Accenture

Advanced Application Engineering Intern

Vikhroli, Mumbai

May 2026 – Jul. 2026

- Completed structured training in Generative AI, Agentic AI architectures, and enterprise Cybersecurity fundamentals as part of Accenture's AEH program
- Developing an internal enterprise platform featuring AI-powered talent matching with natural language search, skill graph inference, and availability forecasting, alongside a structured offerings catalogue for reusable internal tools

PROJECTS

FinGuard | [GitHub](#) | Next.js, PostgreSQL, Prisma, FastAPI, Prophet, Monte Carlo Simulation

Feb. 2026 – Jun. 2026

- Built a full-stack personal finance dashboard with bank transaction ingestion and cashflow analytics, backed by a Python ML service using Prophet for time-series expenditure forecasting and Monte Carlo simulation for savings failure risk, VaR/CVaR, downside risk, and recovery probability
- Designed three financial simulation tools — Finance Survival, Purchase Affordability, and What-If Scenario — where ML-driven risk scores are translated into plain-English health grades, advisory flags, and deficit warnings
- Implemented interactive Recharts visualisations, predictive deficit risk scoring, and emergency fund coverage analysis, secured with NextAuth.js and a Prisma/PostgreSQL data layer

Harbinger | [GitHub](#) | Node.js, PostgreSQL, Redis, WebSockets, Docker, JWT

Jun. 2026 – Present

- Building a distributed API degradation tracker that monitors endpoints for latency regressions, error-rate spikes, and performance anomalies, with a time-series ingestion pipeline and Redis-backed scoring for real-time detection
- Implementing configurable alerting thresholds, historical trend storage in PostgreSQL, and a WebSocket-powered live dashboard for incident visibility across monitored services
- Containerising the full stack with Docker Compose with JWT-based authentication and plans for cloud deployment

Skillslate | [GitHub](#) | Next.js, PostgreSQL, Prisma, Gemini API, pdf-parse, Multer, LaTeX

Jun. 2025 – Jul. 2025

- Built and deployed a full-stack AI resume platform with step-by-step form generation, LaTeX PDF export via a self-hosted compiler backend, ATS scoring, and job-match analysis against scraped job descriptions
- Implemented GitHub profile AI review, resume-job matching, and Gemini-powered bullet enhancement with role-tuned prompts, alongside a user dashboard for resume history and analytics
- Integrated NextAuth.js with Prisma adapter for authentication, pdf-parse for resume ingestion, and Multer for file uploads

ACHIEVEMENTS

- Ranked **1st in the branch** at IIITDM Jabalpur from 2nd Semester through 6th Semester, and in the **Top 1%** nationwide in the SWAYAM Operating Systems certification exam (CPI: 9.3/10)
- Co-inventor on a patent for an **AIoT-based water quality monitoring system** integrating sensor networks with an ML classification model
- Solved **1000+ problems** across LeetCode, Codeforces, and InterviewBit ([LeetCode Profile](#))
- Advanced to final rounds of **HackByte 4.0**, building VeriCourt, an AI-enhanced judicial platform, and **CanYouHackIt** hackathon
- Core committee member organising Vishu, Onam, and Christmas cultural festivals at IIITDM Jabalpur across **3 consecutive years**

TECHNICAL SKILLS

Programming Languages: C++, Python, JavaScript (ES6+)

Web Development: React, Next.js, Tailwind CSS, HTML5, CSS3

Backend & Infrastructure: Node.js, Express.js, FastAPI, Docker, Redis, REST APIs

Databases: PostgreSQL, MongoDB, Firebase

AI/ML: Scikit-learn, NumPy, Pandas, Prophet, RAG Pipelines, LangChain, Vector Databases (Pinecone)

Developer Tools: Git, Google Cloud Platform, VS Code

CS Fundamentals: Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, System Design
